

# SAHA JEWEL KUMAR

## Full Stack Developer

Saitama, Japan (Open to Tokyo) | +81 80 5052 6822 | jewelsaha072@gmail.com

**DOB:** July 1, 1989 | **Links:** [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

**Visa:** Engineer / Specialist in Humanities / International Services (Until Feb 25, 2028)

## SUMMARY

Full Stack Developer with hands-on experience building production-grade applications using React, Next.js, Node.js, and PostgreSQL. Specializes in real-time features, secure authentication, and scalable API design. Brings a rare blend of engineering-grade precision and modern web development expertise, shaped by professional experience solving real-world problems. Arrived in Japan in 2017, completed language studies, and currently working full-time while advancing software engineering capabilities.

## TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, React, Next.js, Redux, TypeScript, JavaScript, Tailwind CSS
- **Backend:** Node.js, Express.js, Prisma, PostgreSQL, Mongoose, MongoDB, Firebase
- **Tools & DevOps:** Git, Postman, Vercel, Stripe API, Pusher, Cloudinary, Zod
- **Others:** Role-Based Access Control (RBAC), Authentication (JWT/NextAuth), Real-Time Systems, Internationalization (i18n), Payment Integration

## PROJECTS

### Mimamori (Family Caregiving & Monitoring Platform) | [Live Demo](#) | [GitHub](#)

A full-stack platform enabling families to remotely monitor and support elderly relatives through daily check-ins, medication tracking, and real-time communication.

- Built role-based permission system (Owner, Editor, Viewer) with granular family member access control
- Implemented QR-code passwordless check-in flow, allowing elderly users to log daily status without needing to log in
- Developed real-time family chat and emergency alert system using Pusher for instant push notifications across all devices
- Integrated medication reminder system with scheduled notifications and adherence history tracking

*Tech Stack: Next.js 16, React 19, TypeScript, Prisma, PostgreSQL (Neon), NextAuth, Pusher, Tailwind CSS, Zod*

### Anshin Stay (Multi-Role Rental Application Platform) | [Live Demo](#) | [GitHub](#)

A rental application platform streamlining the housing process for tenants, property owners, and agents in Japan, with built-in guarantor verification.

- Designed a multi-role system (Tenant, Owner, Agent, Admin) with distinct dashboards and permission scopes for each role
- Built a multi-stage application approval workflow (Pending → Owner Approved → Guarantor Verified → Agent Verified → Completed)
- Implemented internationalization (next-intl) to support multiple languages, improving accessibility for foreign tenants
- Built type-safe forms using React Hook Form and Zod schema validation across all application steps

*Tech Stack: Next.js 16, React 19, TypeScript, Prisma, PostgreSQL, NextAuth, next-intl, React Hook Form, Zod*

## EXPERIENCE

### Machine Operator — Kyowa Kurieito

Feb 2020 – Present

- Maintaining full-time employment in the printing industry while dedicating evenings and weekends to mastering full-stack development.

### Project-Based Full Stack Development (Self-Learning & Real-World Projects)

- Built multiple full-stack web applications from scratch following industry-standard workflows
- Designed and implemented RESTful APIs integrated with modern frontend services
- Worked extensively with relational (Prisma + PostgreSQL) and NoSQL (MongoDB) databases
- Implemented secure authentication, protected routes, and role-based access control

## EDUCATION

- **B.Sc. in Civil Engineering** — Stamford University Bangladesh 2009 – 2013
- **Fuji Language School** (Japanese Language Course) 2017 – 2019
- **NIPPON ACADEMY Omotenashi College** (Withdrawn for work visa) Apr 2019 – Jan 2020
- **Professional Web Development Training** (Programming Hero | Level 1 & 2) 2024 – 2025

## LANGUAGES

- **Japanese:** Conversational (Daily Life & Workplace)
- **English:** Conversational
- **Bengali:** Native
